WPLOCKER.COM

1. QUICK SETUP

- Install **Gravity Forms** (not included in this plugin)
- Upload and Activate the „**Gravity Forms - List & Edit**“ Plugin
- Setup the Form Settings at the Gravity-Forms Settings Page
- Setup the Field Settings for each Form-Field that should be displayed at the Advanced-Settings
- Include the 'Gravitylist' Shortcode at your content

WPLOCKER.COM

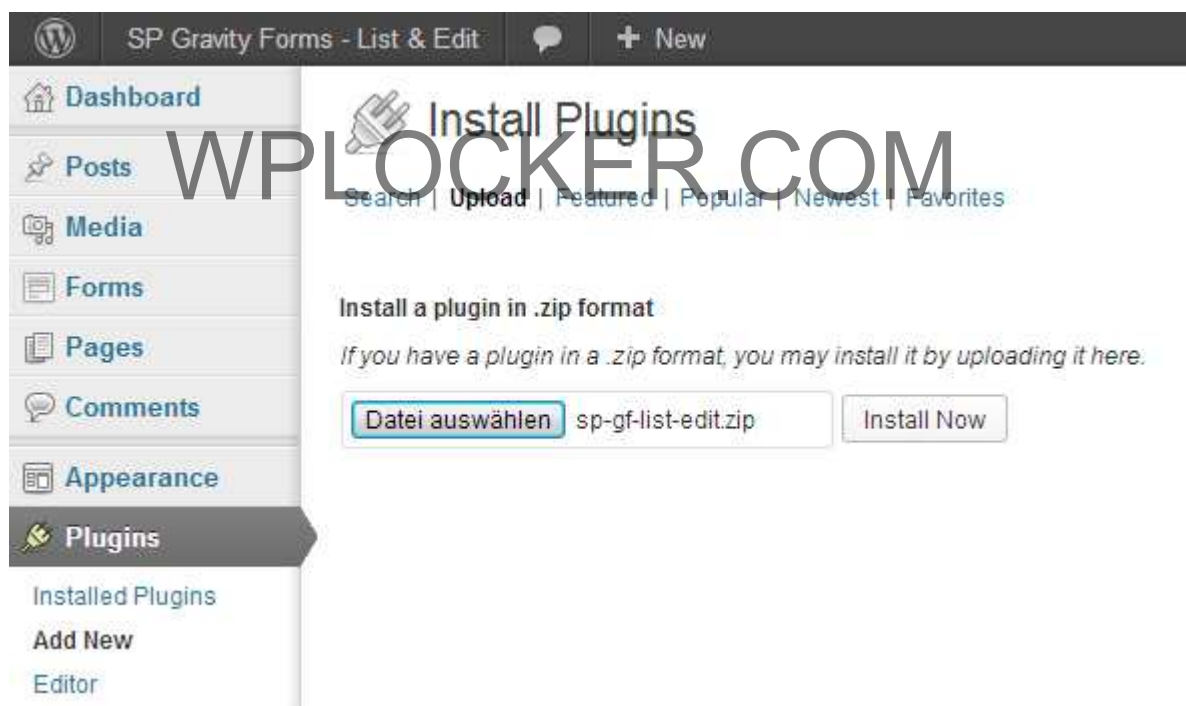

2. UPLOAD AND ACTIVATE

2.1. UPLOAD

After you downloaded and saved the 'Graviy Forms - List & Edit' Plugin you have to upload it to your wordpress installation.

Please go to you 'Plugins/Add New' Menu, select 'Upload' from the top links and choose the downloaded ZIP-File at the upload-field.

After selecting the File please press the „Install Now“ Button.

2.2. ACTIVATE

After the Plugin is uploaded you will get a succes screen.
Please use the Link „Activate Plugin“ to activate the Plugin.

Installing Plugin from uploaded file: sp-gf-list-edit.zip

Unpacking the package...

Installing the plugin...

Plugin installed successfully.

[Activate Plugin](#) | [Return to Plugins page](#)

After this you will get a new Section at the Settings-Menubar called „SAP User Connect“.

2.3. UPDATEING THE PLUGIN

After you update the plugin it is necessary to re-save the settings-page of every form.

3. ENTRY LIST SETUP

To setup the Entry-List to display all entries of your Form you have to select the Fields wich should be displayed.

This could be setuped for each Field at the Advanced-Field-Settings.

3.1. SELECT THE FIELDS TO DISPLAY

Please go to your Gravity-Forms Form-Editor, pick the needed Fields and switch to the Advanced-Settings-Tab.

There will be a new Setting „Show Field in Entry List“.

Only if this Checkbox is selected the Field will be displayed at the Entry List.

Single Line Text : Field ID 1

☐ Allow field to be populated dynamically ?

☐ Enable Conditional Logic ?

☒ Show Field in Entry List

3.2. INSERT THE 'GRAVITYLIST' SHORTCODE AT YOUR CONTENT

To Insert the Entry-List into a Wordpress Page or Post you only have to place a Shortcode at the needed position.

Syntax :

`[gravitylist id="x"]`

„x“ is the Number of the Gravity-Form.

Tip :

To make it easier you also could copy your Gravity-Forms shortcode and change the „[gravityform“ to „[gravitylist“

WPLOCKER.COM

Number of Rows

Define the number of rows that will be displayed.

CSS Class Name

Define the name of a CSS-Class that will be used to display the Entry-List.

Display Lead-Id

If this setting is checked a column with the Lead-Id (internal record-id of Gravity-Forms) will be added as first column to the entry list.

Require User to be logged in

If this setting is checked it's only possible for logged-in users to view the Entry-List.

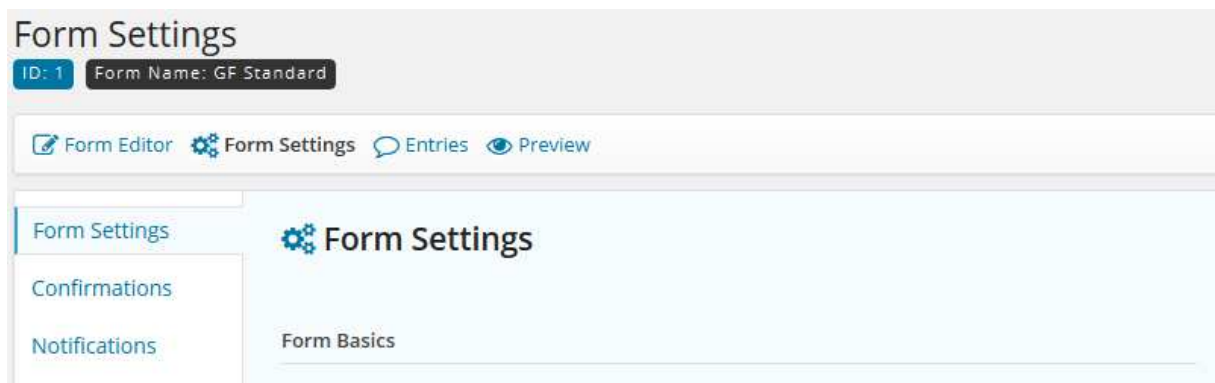

Show Records to all users

If this setting is checked all Entries will be listed. If this settings isn't checked the user only will see his own entries (Form-Admins will also see all entries)

WPLOCKER.COM

4. EDIT MODE SETUP

At the Form-Settings you have some additional Settings to turn on the Edit-Mode.
Please go to the Form-Settings-Tab of Gravity-Forms.

At the Bottom you'll find the new Settings of the „Gravity-Forms – List & Edit“ Plugin.

Gravity Forms - List & Edit Settings

Page to the gfEdit destination	<input type="text" value="Standard Fields"/>

WPLOCKER.COM

Enabled Edit-Mode

To Enable Edit-Mode you only have to check this Field and select the page of your form, you need to edit.

Enable View Button

If this setting is checked a 'View' button will be displayed for each entry. If the User uses this button he will be redirected to the Form in a special Rea-Only mode.

Enable Delete Button

If this setting is checked a 'Delete' button will be displayed for each entry. If the User uses this button he will be redirected to the Form in a special Rea-Only mode, where he could delete this entry.

Enable Addnew Button

If this setting is checked a 'Addnew' button will be displayed at the bottom of the Entry-List.

Page to the gfEdit destination

Here you could select the Wordpress-Page of your form, you need to edit.

After you turned the Edit-Mode on you will have a new Button „Edit“ at your Entry-List.

If you click on this Button you will be redirected to the selected Wordpress-Page of your Gravity-Form and the selected Entry could be edited.

NUMBER	CHECKBOXES	RADIO BUTTONS	
998877	<ul style="list-style-type: none">• First Choice• Second Choice	Second Choice	<input type="button" value="Edit"/>

5. TQUERY SUPPORT

The Gravity-Forms List & Edit Plugin supports the famous „tQuery - Dynamic Tables“ Script.
(you could view and download the „tQuery - Dynamic Tables“ Script from here :
<http://codecanyon.net/item/tquery-dynamic-tables/89478>)

To add support you only have to save the full 'tquery' folder into the Gravity-Forms List & Edit Plugin. The Plugin will automatically detect the script.
(must be something like this '....wp-content/plugins/sp-gf-list-edit/tquery/')

If the plugin detects tQuery there will be some special settings at the Gravity-Forms Form-Settings to adjust tQuery support.

The screenshot shows the 'Gravity List & Edit Settings' interface. It features three settings, each with a checkbox and a descriptive label:

Setting	Value
Enable tQuery	<input checked="" type="checkbox"/> Enable tQuery support
Display tQuery search	<input checked="" type="checkbox"/> Show the tquery search box
Display tQuery pagination	<input checked="" type="checkbox"/> Show the tquery pagination (the row setting will be used)

Enabled tQuery

If this setting is checked the tQuery support for this Entry-List will be enabled.

Display tQuery search

If this settings is checked a 'search' field will be displayed to filter the ouput.

Display tQuery pagination

If this setting is checked the integrated tquery paginationen will be displayed.
The 'rows' settings will be used.

WPLOCKER.COM

6. SP-GF-MYSQL-CONNECT PLUGIN SUPPORT

The Gravity-Forms List & Edit Plugin supports the Gravity-Forms MySQL Connect Plugin.

Please refer to the Gravity-Forms MySQL Connect Manual to learn, how it's possible to edit MySQL-Records.

WPLOCKER.COM

7. APPENDIX

7.1. ADVANCE SHORTCODE SETTINGS

It's possible to overwrite the default settings with some attributes at your shortcode.

<i>Attribute</i>	<i>Description</i>
id="x"	Number of the Form to display
rows="x"	Number of rows that will be displayed
debug="false true"	Turn on the 'Debug-Mode'. At the Debug-Mode the Gravity-Forms Field-Number and Field-Type will be displayed at the List-Header. Default is 'false'
title="true false"	Display the Form-Title or not. Default is 'true'.
tquery="false true"	Enable or disable tQuery support. As default the setting from the form-settings will be used.
showtoall="false true"	Define if a user could see all or only his own entries. As default the setting from the form-settings will be used.
description="true true"	Display the Form-Description or not. Default is 'true'.
displaylead="true true"	Display the Lead-Id as a own column. As default the setting from the form-settings will be used.
requirelogin="false true"	User must be logged-in to see the Entry-List. As default the setting from the form-settings will be used.
